SAFETY DATA SHEET

1. Identification

Product identifier Lead Acid Battery Wet, Filled With Acid
Other means of identification
Synonyms may include gel/absorbed electrolyte type lead acid batteries
Recommended use Electric storage battery.
Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information
Manufacturer/Supplier East Penn Manufacturing Company, Inc.
Address 102 Deka Road, Lyon Station PA 19536
Telephone number (610) 682-6361
Contact person East Penn EHS Department
Emergency telephone number USA/Canada: CHEMTREC (800) 424-9300, Outside USA 1 (703) 527-3887
E-mail contactus@eastpenn-leads.com

2. Hazard(s) identification

Physical hazards Explosive Chemical, Division 1.3
Health hazards
Acute toxicity, oral Category 4
Acute toxicity, inhalation Category 4
Skin corrosion/irritation Category 1A
Serious eye damage/eye irritation Category 1
Carcinogenicity Category 1A
Reproductive toxicity Category 1A
Specific target organ toxicity, single exposure Category 1A (respiratory system)
Specific target organ toxicity, repeated exposure Category 3 respiratory tract irritation
Specific target organ toxicity, single exposure Category 1A (respiratory system)

Environmental hazards Hazardous to the aquatic environment, acute hazard Category 1
Hazardous to the aquatic environment, long-term hazard Category 1

OSHA defined hazards Not classified.

Label elements

Signal word Danger
Hazard statement Harmful if swallowed. Harmful if inhaled. Causes severe skin burns and eye damage. May cause cancer. May damage fertility or the unborn child. Causes damage to organs (respiratory system). Causes damage to organs (respiratory system) through prolonged or repeated exposure. May cause respiratory irritation. Very toxic to aquatic life with long lasting effects.
Precautionary statement
Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not breathe dust/mist/vapors. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection.
Response
If swallowed: Rinse mouth. Do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. Wash contaminated clothing before reuse. Collect spillage.

Storage
Store in a well-ventilated place. Keep container tightly closed.

Disposal
Refer to manufacturer/supplier for information on recovery/recycling. Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)
Under normal conditions of processing and use, exposure to the chemical constituents in this product is unlikely. The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

Supplemental information
In use, may form flammable/explosive vapor-air mixture.

3. Composition/information on ingredients

Mixtures

Composition comments
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume. Content composition concentrations will vary with battery type/size.

4. First-aid measures

Inhalation
Exposure to contents of an open or damaged battery: Move injured person into fresh air and keep person under observation. Get medical attention if any discomfort continues.

Skin contact
Exposure to contents of an open or damaged battery: Immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if irritation develops and persists.

Eye contact
Exposure to contents of an open or damaged battery: Flush thoroughly with water for at least 15 minutes. Hold eyelids open during flushing. If irritation persists, repeat flushing. Get medical attention if irritation develops and persists.

Ingestion
Exposure to contents of an open or damaged battery: Rinse mouth thoroughly with water. DO NOT induce vomiting because of danger of aspirating liquid into lungs. Get medical attention immediately.

Most important symptoms/effects, acute and delayed
Under normal conditions of processing and use, exposure to the chemical constituents in this product is unlikely. The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful. Heavy lead exposure may result in central nervous system damage, encephalopathy and damage to the blood-forming (hematopoietic) tissues.

Indication of immediate medical attention and special treatment needed
Treat symptomatically.

General information
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media
Dry chemical, foam, carbon dioxide, water fog.

Unsuitable extinguishing media
Do NOT use water on live electrical circuits.

Specific hazards arising from the chemical
Batteries evolve flammable hydrogen gas during charging and may increase fire risk. Containers may explode when heated.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

Fire fighting equipment/instructions
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
Like any sealed container, battery cells may rupture when exposed to excessive heat; this could result in the release of corrosive and flammable materials.
6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Avoid contact with skin.

Methods and materials for containment and cleaning up

Neutralize the spilled material before disposal. Sweep up or vacuum up spillage and collect in suitable container for disposal. Dispose of waste and residues in accordance with local authority requirements.

Environmental precautions

Prevent runoff from entering drains, sewers, or streams.

7. Handling and storage

Precautions for safe handling

In the event of damage resulting in a leak of exposed materials, avoid contact with contents of an open or damaged cell or battery. Keep away from heat, sparks and open flame. Do not allow conductive material to touch the battery terminals. A dangerous short-circuit may occur and cause battery failure and fire.

Conditions for safe storage, including any incompatibilities

Store in original tightly closed container. Protect containers from damage. Place cardboard between layers of stacked batteries to avoid damage and short circuits.

8. Exposure controls/personal protection

* - For sampling details, please see the source document.

Appropriate engineering controls

Provide adequate ventilation. Provide easy access to water supply and eye wash facilities.

Individual protection measures, such as personal protective equipment

Eye/face protection

None under normal conditions. Leak from a damaged or opened battery: Wear safety glasses with side shields (or goggles).
9. Physical and chemical properties

Appearance
- Physical state: Solid.
- Form: Sulfuric acid, liquid. Lead, solid.
- Color: Not available.
- Odor: Odorless.
- Odor threshold: Not available.
- pH: < 1
- Melting point/freezing point: Not available.
- Initial boiling point and boiling range: 235 - 240 °F (112.78 - 115.56 °C) (Sulfuric acid)
- Flash point: Below room temperature (as hydrogen gas).
- Evaporation rate: < 1 (n-BuAc=1)
- Flammability (solid, gas)
  - Flammability limit - lower (%): 4 % (Hydrogen)
  - Flammability limit - upper (%): 74 % (Hydrogen)
- Vapor pressure: 10 mm Hg
- Vapor density: > 1 (Air=1)
- Relative density: 1.27 - 1.33
- Solubility(ies)
  - Solubility (water): 100 % (Sulfuric acid)
- Partition coefficient (n-octanol/water): Not available.
- Auto-ignition temperature: Not available.
- Decomposition temperature: Not available.
- Viscosity: Not available.
- Other information
  - Explosive properties: Not explosive.
  - Oxidizing properties: Not oxidizing.

10. Stability and reactivity

Reactivity Chemical
- Stability: The product is non-reactive under normal conditions of use, storage and transport.
- Possibility of hazardous reactions: Stable at normal conditions.
- Conditions to avoid: Overcharging. Ignition sources.
Hazardous decomposition products  

11. Toxicological information

Information on likely routes of exposure

- **Inhalation**: Exposure to contents of an open or damaged battery: Harmful if inhaled. Causes severe respiratory tract irritation.
- **Skin contact**: Exposure to contents of an open or damaged battery: Causes severe skin burns.
- **Eye contact**: Exposure to contents of an open or damaged battery: Causes serious eye damage.
- **Ingestion**: Exposure to contents of an open or damaged battery: Harmful if swallowed.

Symptoms related to the physical, chemical and toxicological characteristics

- Exposure to contents of an open or damaged battery: Dust may irritate the eyes and the respiratory system.

Information on toxicological effects

- **Acute toxicity**: Exposure to contents of an open or damaged battery: Harmful if inhaled or swallowed.

Components

<table>
<thead>
<tr>

<tr>
<td>LD50</td>
</tr>
<tr>
<td>Rat</td>
</tr>
<tr>
<td>2140 mg/kg</td>
</tr>
</tbody>
</table>

- **Skin corrosion/irritation**: Exposure to contents of an open or damaged battery: Causes severe skin burns.
- **Serious eye damage/eye irritation**: Exposure to contents of an open or damaged battery: Causes serious eye damage.

- **Respiratory or skin sensitization**
  - Respiratory sensitization: No data available.
  - Skin sensitization: No data available.
  - Germ cell mutagenicity: No data available.

Carcinogenicity

- The International Agency for Research on Cancer (IARC) has classified "strong inorganic acid mists containing sulfuric acid" as a known human carcinogen, (IARC category 1). This classification applies only to mists containing sulfuric acid and not to sulfuric acid or sulfuric acid solutions.

  - IARC Monographs. Overall Evaluation of Carcinogenicity
    - Electrolyte (Sulfuric acid) (CAS 7664-93-9): 1 Carcinogenic to humans.
    - Lead and lead compounds (inorganic) (CAS 7439-92-1): 2B Possibly carcinogenic to humans.

  - NTP Report on Carcinogens
    - Electrolyte (Sulfuric acid) (CAS 7664-93-9): Known To Be Human Carcinogen.
    - Lead and lead compounds (inorganic) (CAS 7439-92-1): Reasonably Anticipated to be a Human Carcinogen.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1053)

- Not regulated.

Reproductive toxicity

- None under normal conditions. Exposure to contents of an open or damaged battery: May damage fertility or the unborn child.

Specific target organ toxicity

- **Single exposure**: None under normal conditions. Exposure to contents of an open or damaged battery: Causes damage to organs (respiratory system).
- **Repeated exposure**: None under normal conditions. Exposure to contents of an open or damaged battery: Causes damage to organs through prolonged or repeated exposure: Respiratory system.

Aspiration hazard

- Due to the physical form of the product it is not an aspiration hazard.

Chronic effects

- Exposure to contents of an open or damaged battery: Heavy lead exposure may result in central nervous system damage, encephalopathy and damage to the blood-forming (hematopoietic) tissues. Chronic inhalation of sulfuric acid mist may increase the risk of lung cancer.

12. Ecological information

Ecotoxicity

- The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment. Exposure to contents of an open or damaged battery: Very toxic to aquatic life with long lasting effects.
Components | Species | Test Results
--- | --- | ---
Lead and lead compounds (inorganic) (CAS 7439-92-1) | LC50 Rainbow trout, donaldson trout (Oncorhynhus mykiss) | 1.17 mg/l, 96 Hours

Persistence and degradability
The degradation half-life of the product is not known. Lead and its compounds are highly persistent in water.

Bioaccumulative potential
Bioaccumulation of lead occurs in aquatic and terrestrial animals and plants, but very little bioaccumulation occurs through the food chain.

Mobility in soil
If the product enters soil, one or more constituents will or may be mobile and may contaminate groundwater.

Mobility in general
The product is insoluble in water and will spread on water surfaces.

Other adverse effects
None known.

13. Disposal considerations
Disposal instructions
Recycle the batteries, as the primary disposal method. Neutralize electrolyte/sulfuric acid. Avoid discharge into water courses or onto the ground. Dispose of in accordance with local regulations.

Local disposal regulations
Empty containers should be taken to an approved waste handling site for recycling or disposal.

Hazardous waste code
RCRA: Spent lead-acid batteries are not regulated as hazardous waste when recycled. Depending upon circumstances, the following waste codes may apply:
- Spilled electrolyte/Sulfuric acid. D002: Corrosive waste

Waste from residues / unused products
Avoid discharge into water courses or onto the ground.

Contaminated packaging
Since emptied containers retain product residue, follow label warnings even after container is emptied.

15. Regulatory information

US federal regulations

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200. All components are on the U.S. EPA TSCA Inventory List.

Hazardous Chemical Reporting Requirements apply when an Extremely Hazardous Substance is present at a facility in an amount equal to or exceeding 500 pounds or the Threshold Planning Quantity, whichever is lower per 40CFR370.10(a)(1).

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)

Antimony (CAS 7440-36-0) Listed.
